The Community Empowering Peer-to-Peer Global Currency.

## SmartCash is a Revolutionary Cryptocurrency

- A Peer-to-Peer Digital Currency & Decentralized Ledger *(also known as Blockchain Technology)*.
- Empowering individuals and their communities by allowing payments & purchases without the need for third parties such as banks and credit card companies.
- Anyone with a computer, laptop or mobile device can be an integral "node" within the system, helping to secure and power the network.

Focused on Ease-of-Use & Adoption

- Constantly innovating features that simplify the Point-of-Sale experience for both Businesses and Consumers.
- The SmartCard allows anyone to create & print their own card right from home, or keep it on their mobile device.
- A true peer-to-peer payment system with instant transaction approvals and near 0% fees.

Empowering its Community

- Driven and powered by it's community, the SmartHive is a Decentralized Organizational & Governance Model inspired by the bee colony.
- SmartHive enables anyone to get involved by submitting & voting on proposals that would help the development, growth and/or adoption of SmartCash.
- Projects are funded by the SmartHive Project Treasury which receives a generous share of the network Block Reward.
- We believe this approach to community involvement helps generate organic growth at a grassroots level, and allows SmartCash to be nimble, adapting to the community's needs.

SmartHive | Incentivised & Decentralized Community Governance Structure
